Happy Spring! After a successful autumn term we are looking forward to learning and growing more and preparing ourselves for the journey into the juniors ahead. This term we are applying our foundational concepts in English and Maths to new and exciting learning.

The first half term of spring will sadly be our last attendance of forest school with Mrs Miles and we thank her greatly for the fantastic experience she has created for them. In the following terms we will look to do as much outdoor learning within each of the subjects as possible and apply all those skills learned.

We are excited to see more clubs starting after school this term to extend learning in the different foundational subjects such as science, PE and Art and we do encourage you to enquire about these.

Your children continue to be at the heart of what we do and are each growing into e curious, confident and resilient minded children. In continuing this journey, our key focus areas are:

- Supporting both their physical and mental wellbeing
- developing strong relationships
- setting high expectations
- Delivering fun, engaging lessons

Our theme this term is World Wanderers. We will be exploring the Earth we live on and its many human and physical geographical features. Further into the term, we look forward to a local trip to put our geographical skills to the test!
